

UV-BOX

Professional UV Wall Device for Disinfection and Storage of Laboratory Materials, Tools and Equipment

Chemical and Ozone-free Storage and Germ Removal

This wall device is typically installed in medical or laboratory facilities and used for the germ-free storage of cleaned tools and instruments.

Another area where the device is used is in meat processing facilities for the storage of necessary tools after cleaning.

The UVC-opaque polycarbonate pane in the door of the stainless steel device guarantees reliable shielding from the UVC rays generated.

The locking mechanism automatically deactivates the UVC lamp when the door is opened.

By using the integrated timer, users can select exposure times from one second up to six hundred minutes. Depending on the required function, the UV BOX can be outfitted with a variety of specimen holders.

Applications:

- Medicine
- Storage
- Kitchen
- Laboratory
- Sales Rooms
- Animal Breeding and Plant Cultivation

Characteristics:

- Selectable UV-C exposure times
- Door disables light automatically
- Large viewing window
- Operating time display
- All parts tested UV-C durable
- Housing made from stainless steel AISI 304
- Delivery with knife holder (variant -C)
- Delivery with floor mat (variant-R)
- Easy to install
- Runs through standard 230V wall outlet
- Safety category IP 55
- CE Markings (LVD, EMC, MD, RoHS)
