

UV-STYLO-X

For Installation in New or Existing Intake or Exhaust Systems for the Purpose of Decontamination

UV-STYLO-X can be integrated into new or already existing facilities.

The UV-STYLO-X consists of a UV-C high-output low-pressure lamp which is protected from extreme high or low temperatures by a quartz tube.

For disinfection of the inner surfaces of containers, the UV-STYLO-X can also be installed in restricted spaces, for which only one opening (50mm bore diameter) is required.

A stainless steel adaptor allows the device to be installed into a ventilation duct from the outside. Control and power provision for the unit are provided through an external control box.

Characteristics:

- Installation in restricted spaces
- Mounting Adaptor made from stainless steel AISI 304
- Emitter in watertight quartz tube
- Electrical connection from outside
- Safety category IP 40
- Various lengths available
- Material tested UV-C durable
- Maintenance and control through an external box
- Electronic ballast
- CE Markings (LVD, EMC, MD, RoHS)
